

AB McLAUCHLAN :: WELLIVER METAL

TRIPLE R DIAMETER SIZE GRADING

THE GENTLE TOUCH

The patented *Triple R Diameter Size Grader* is an economical solution for your delicate sizing applications. The simple design allows for *easy installation* with your existing equipment and, *easy operation* with minimal operator training. Typical sizes range from 1/2" diameter to 5" diameter with capacities up to thirty tons per hour.

QUALITY CONSTRUCTION

Corrosion resistant stainless steel construction for years of trouble-free service in harsh environments. Designed and backed by a company with a reputation for satisfied customers throughout the world

FULLY ADJUSTABLE

This diameter size grader comes with calibrated dials for easy on-the-fly adjustment to pinpoint exact size requirements. A variable speed drive can also be included, along with other custom options tailored to your processing needs.

FEATURES

- Sanitary Construction
- Multiple diameter ranges
- Simple adjustments
- Modification per customer specifications
- Open throat design to accommodate product removal

ADVANTAGES

Several advantages over conventional sizing methods are simplicity, efficiency, and accuracy. The most important advantage is the gentle action of the grading fingers so there is no rolling, pinching or marking of your product
