

AB McLAUCHLAN :: WELLIVER METAL

LENGTH SIZE GRADING

Putting the Right Size Potato in the Right Place is the Key to Efficiency

Designed for maximum flexibility, this remarkable machine makes it easy to fine tune the grading process. Gap adjustment, diverter adjustment, and open/close gates work together to let you make the best possible choices about what length product goes where. Simplicity of operation and maintenance is unprecedented. The fully stainless steel/Poly Urethane design is the best in the industry, making cleaning and sanitation a simple process. The Layton/SID Length Grader offers smooth, uninterrupted grading hour after hour, and it operates at up to 85,000lbs/hr of peeled potatoes. If you need trouble free length sizing, you need Layton/SID Grader.

- Easy Adjustable Rolls for Multiple Sizes
- Simple Non-Plugging Design
- Very Cleanable with Fewer moving parts than other designs
- No Rubber fingers or pockets to clean or break
- High Capacity Units up to 85,000lbs of Peeled Potatoes (Note: 65,000lbs/hr. with Skin on Potatoes)
